1、 Company Profile

- **Company name** : **FUJI KOKI CO.,LTD.**
- **Establishment** : **March 26, 1963**
- **Capital** : **95,000,000 JPY**
- **Employees** : **100**
- **Head quarters** : **Ichinomiya-Shi,
Aichi-ken, Japan**
- **Branch office** : **Tokyo, Osaka, Kyushu**
- **Overseas base** : **Korea**

2、 The outline of our business

2-1) Dust Collecting

Dust Collecting Division having the longest history at FUJI KOKI CO., LTD. take the charge of design and production of dust collecting plant to prevent air pollution in principle. In particular, the bag filters taking the role of countermeasure for preventing various kinds of dust are provided with our originally technological concept and are highly evaluated in the field concerned.

Environment dust collector

Spot dust collector

Dust collector

For pneumatic conveying system

Fine Lime collecting Bagfilter

Exhaust gas treatment equipment for paper mills

FUJI KOKI CO.,LTD

2、 The outline of our business

2-2) Powder Handling

Division taking the charge of design, production and delivery of all powder material treatment machines and equipments such as storage, crushing & grinding, classifying, transporting and discharging. Division playing the role of whole engineering works for large scaled powder treatment plants. In particular, this division is always aiming at collection of our basic studies/know-how given in this field extending over a long period of time and succeeds in securing reliable estimation by our customers due to its timely conception resulting in adoption from starting the project as their planning, developing, and designing partner.

Equipment

Limestone Milling Facilities

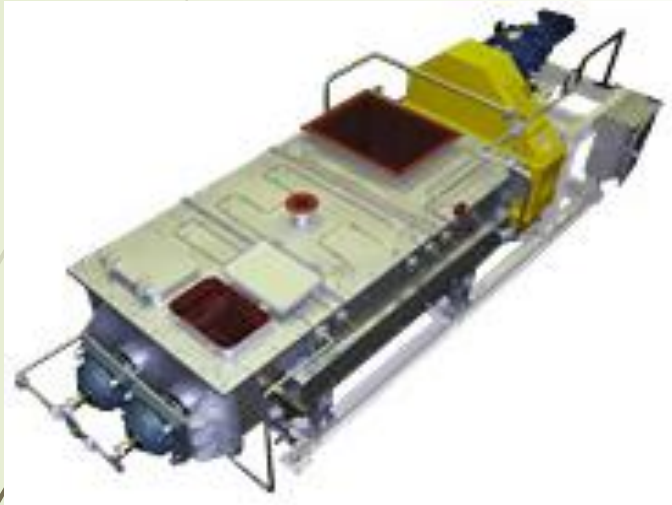

2、 The outline of our business

2-3) Chemical Machinery

Chemical Machinery Division taking the charge of developing chemical plant with our watchword of “Suggestion with Value Added” by means of our exclusively chemical knowledge/know-how. It is our concept that a quite new world could be generated and brought by means of applying neutralization, reduction and analysis in the atomic world different from physically technological world. We, FUJI KOKI CO.,LTD. have started to grapple with public hazard due to chemical property of powder material, mercury compound and exhausted gas of dioxin now in question. Chemical Machinery Division is the newest group of our company.
